

2.4.1 Quality and Environmental Policy Statement

It is the policy of this Company to provide comprehensive multi-discipline Engineering Services that are designed to satisfy our Clients requirements. We believe that our Customers require a Quality and Environmental service and this we achieve by the consistent application of our Quality and Environmental Management System, that ensures that our Quality and Environmental standards are maintained at all times.

We are constantly looking at ways to improve our Quality and Environmental System and hence our service, especially in line with the ever-changing background to our business, through operational efficiency and being aware of Health & Safety and the needs of the Environment.

It is the policy of this company to comply with relevant environmental legislation, and other requirements where they may be set by our customers or relevant stakeholders, such as regulators or sector bodies. The company is committed to continual improvement and the prevention of pollution.

The Quality and Environmental Management System operated by this Company has specified and formally defined requirements contained within the Quality Manual and associated Procedures. These documents are designed and written to ensure our system complies with the National and International published standards on Quality Assurance and Environmental Management namely ISO 9001:2015 and ISO 14001:2015 whilst also having regard to relevant Statutory Instruments, statutory Codes of Practice and other formally documented practices which impact on our business.

In order to ensure that Quality and Environmental requirements are met, there is a defined management responsibility to ensure that all personnel are adequately trained and suitably experienced.

All members of staff, at all levels of responsibility, are aware of the requirements of the Quality and Environmental Management System and of our commitment to providing services of a consistent quality that meet and exceed the defined needs of our Clients. The Company shall set and review the Quality and Environmental objectives and targets as part of the Management Review.

The Quality and Environmental Manager is responsible for ensuring that the defined requirements and procedures are implemented and maintained; that Quality and Environmental assurance problems are identified; and that those effective corrective actions are carried out. In the event that any problem regarding the Quality and Environmental Management System is not resolved to the satisfaction of the Quality and Environmental Manager, it will be referred to me for immediate action.

G. Raisbeck
Managing Director
