

FOOD & DRINK

Celebrating safety excellence with Gü

Gü Indulgent Foods Limited has partnered with RB Group to deliver a new advanced manufacturing facility to create patisserie-inspired, indulgently layered desserts.

BACKGROUND

This new plant is part of a multi-million pound investment in the Gü Bishops Stortford site. Over the last three years, RB Group, led by our Director Seán McKirdy, has been managing extensive heavy construction work on site, which continues to operate 24/7.

PROJECT SCOPE

The scope of our work included confined space operations, hot works, working at height, excavations, and heavy plant management such as piling rigs and cranes. This has involved extensive detailed planning and close management, including careful traffic flow management, to allow the site to continue operating during the works.

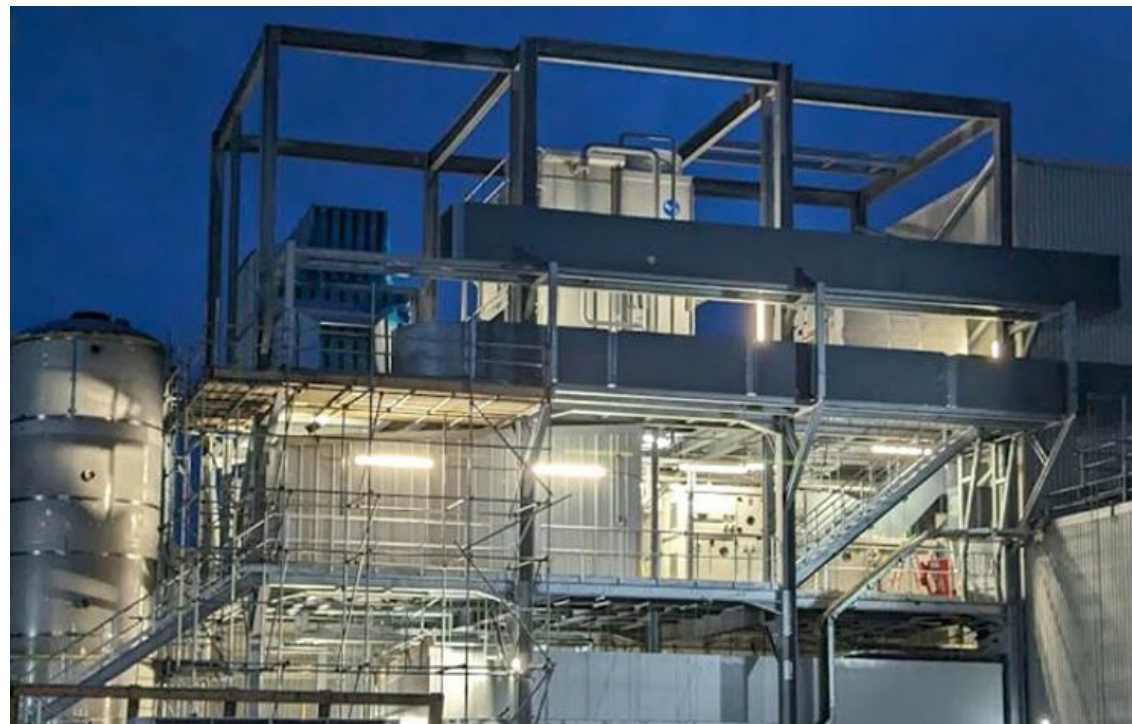

RB Group collaborated with CupixWorks to 3D scan and model the entire Gü site, including all existing equipment, utilities, and buildings. This detailed 3D model of the new packaging line was then integrated into the site model to ensure seamless operation and maintenance once installed. RB Group has also overseen the partial relocation of the existing Gü packaging line to accommodate the new high-speed line. By working closely with the packaging line manufacturer, RB Group has facilitated the off-site construction, full testing, and subsequent installation of the line, ensuring minimal disruption to ongoing site production.

EXEMPLARY SAFETY RECORD

We are proud to announce that, under our management, the team at Gü has achieved an exemplary safety record with zero lost time accidents (LTAs) since the start of the project. We have successfully managed 158,148 man-hours of work to date without a single LTA, reflecting our unwavering commitment to creating a safe and secure working environment for all our employees and partners.

Our success in maintaining a stellar safety record is attributed to:

- ✓ Rigorous Safety Training: Ensuring every team member is equipped with the knowledge and skills to perform their duties safely.
- ✓ Comprehensive Risk Assessments: Identifying and mitigating potential hazards before they impact our projects.
- ✓ Regular Safety Audits: Continuously monitoring and improving our safety practices to meet the highest standards.
- ✓ Fostering a Safety-First Culture: Encouraging open communication and proactive reporting of any safety concerns.

The above image is one of the new structures on site containing a new ammonia plant, air handling units for ISO 7 & 8 production areas, and associated utilities.

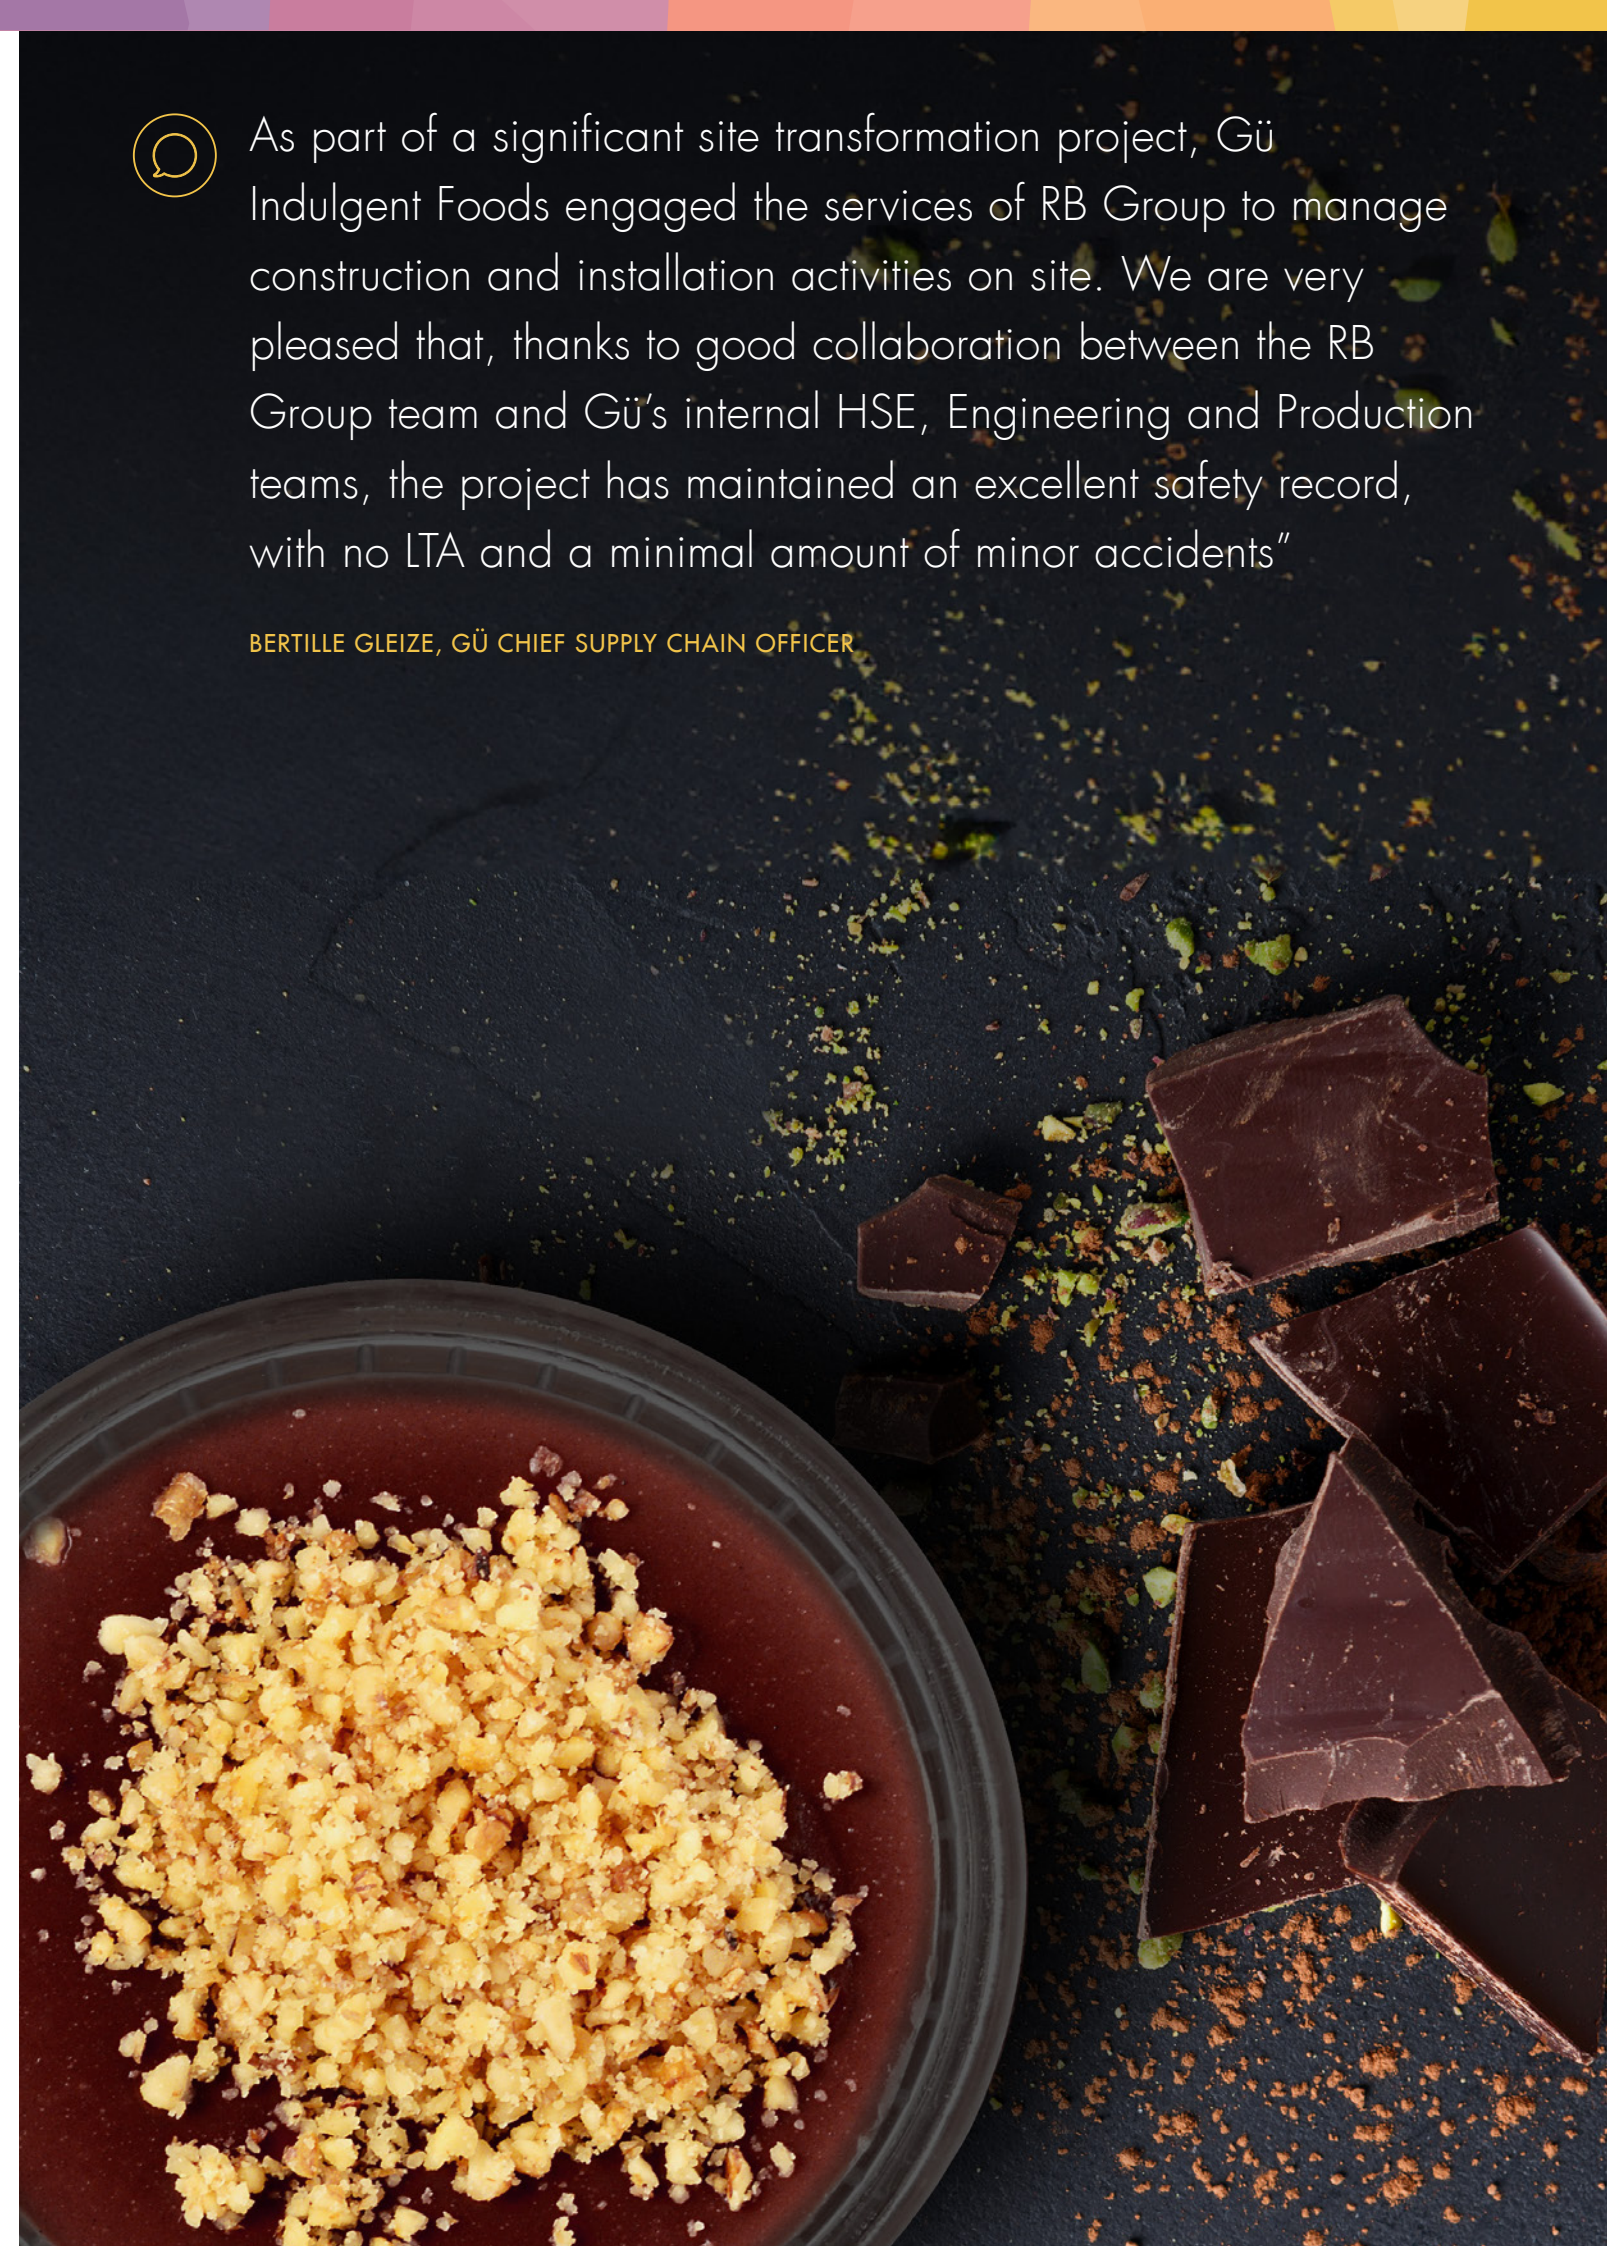

This achievement is a testament to the dedication and vigilance of our entire team, and to the excellent collaboration with our client, Gü. By prioritising safety, we not only protect our most valuable asset—our people—but also enhance the quality and reliability of our services.

Here's to maintaining and building upon our outstanding safety record. Together, we are making every worksite a safer place to work, every single day.

As part of a significant site transformation project, Gü Indulgent Foods engaged the services of RB Group to manage construction and installation activities on site. We are very pleased that, thanks to good collaboration between the RB Group team and Gü's internal HSE, Engineering and Production teams, the project has maintained an excellent safety record, with no LTA and a minimal amount of minor accidents"

BERTILLE GLEIZE, GÜ CHIEF SUPPLY CHAIN OFFICER

ABOUT RB GROUP

RB Group provides professional engineering consultancy, design, project, and construction management services across a wide range of sectors from Pharmaceuticals to Heavy Engineering – applying vision, purpose, and cutting-edge expertise.

We undertake every stage of a project lifecycle from initial conception to commissioning, both globally and within the UK.

Our highly skilled and qualified Process, Mechanical, Civil and Structural, HVAC, CDM, Electrical, Control & Instrumentation Engineers undertake engineering projects of all sizes. These range from smaller scale projects such as plant modifications, expansions,

and upgrades, through to multi-million construction projects. We apply the same levels of client focus and professionalism to every project, regardless of size.

Our high proportion of repeat business coupled with an organically growing new customer base is no accident and reflects our unique approach that make us stand out in the market-place.
